

Straight-through payments. From start to finish

In a fast-moving financial environment, institutions need international payments that are faster, more automated, and more secure. To meet this demand, BT Systems developed BT Payments, a modern platform that streamlines the entire international payments cycle and minimizes operational workload.

Key BT Payments Benefits

Comprehensive Account Reconciliation

Straight-Through Processing (STP)

API Integration for Seamless Connectivity

State-of-the-Art Security

Compatible Application
Trade Finance

2025

Simple, Secure, and Fully Automated Payments

BT Payments enables the sending and receiving of global payments through fast, standardized, and reliable processes. It also allows for automatic fund disbursement to customers' accounts, configurable according to each bank's rules—enhancing both efficiency and security. Likewise, it integrates with the digital client experience platform, enabling automatic submissions based on the conditions defined by each institution.

Seamless Integration with Your System

The platform integrates smoothly with major core engines, enabling:

- Automatic commission collection
- Intelligent notifications
- Application of business rules
- Payment recording and reconciliation

This integration ensures accuracy, consistency, and real-time processing.

A Solution that Grows with Your Business

BT Payments evolves alongside the market and your institution's needs, ensuring continuous innovation and readiness for new challenges in the global ecosystem.
