

Streamlining Corporate Trade from Start to Finish

PeachTree is the Digital Client Experience Platform that connects banks with their clients, enabling them to manage all foreign trade operations in a 100% digital, secure, and real-time environment. Designed to strengthen communication and boost efficiency, PeachTree eliminates physical documentation and centralizes every interaction in one place.

Simple Operations, Total Visibility

With an intuitive interface, PeachTree users can create, submit, monitor, and document their transactions while maintaining direct communication with the bank within the same tool. All messages, files, and records are consolidated into a single, traceable history.

What PeachTree Offers

- Import and export letters of credit
- Standbys and guarantees
- Documentary collections (D/P, D/A)
- Loans, advances, and payments
- Centralized monitoring dashboard
- User profile and permission management
- Document upload and viewing
- Integrated bank-client messaging
- Comprehensive reporting and traceability

Value for Institutions and Corporations

PeachTree reduces operational risk and increases productivity by providing full visibility into the status of each operation, complete audit trails, dynamic reports, and ensured regulatory compliance. Its flexible architecture adapts both to high-volume banks and corporations with specialized processes.
