Trade Finance

2026

In a dynamic and highly competitive financial environment, institutions need to manage Trade Finance with agility, precision, and full adaptability. BankTrade is the platform designed to make this possible: a modern solution that optimizes every stage of the process—regardless of the scale or complexity of the operation.

Comprehensive Trade Finance Management

With a robust, modular architecture, BankTrade supports all core Trade Finance operations—letters of credit, standbys, guarantees, collections, loans, and payments—ensuring efficient, seamless, and fully integrated processes.

Multi-bank, Multi-country, Global Reach

BankTrade allows institutions to manage all operations from a single instance and is built to function across multiple regions. Its specific capabilities for Latin America, Europe, the Middle East, and Asia enable localized configurations with a truly global approach.

Designed for Simple or Complex Operations

From daily processing to the most specialized international transactions, BankTrade provides the tools your institution needs to operate with agility, innovate confidently, and lead in the world of foreign trade.
